Coffee

 ＊ The design of the product may change without notice in order to improve quality. Thank you for your understanding.

V60 Coffee Dripper

Widely recognized around the world, the V60 pour over

Why the cone shape?

The cone shaped paper filter adds depth to the coffee layer, so that the water flows to the center, expanding the amount of time the water is in contact with the ground coffee.

Coffee Mill

Important preparations before brewing coffee

All manual coffee grinders use mills made of ceramic. Ceramic mills keep the temperature down when grinding and can be easily rinsed with no potential rusting. Coffee mill size, material and variations are all important items for deliciously brewed coffee.

V60 Drip Scale

Requirements for brewing delicious coffee

In order to brew delicious coffee, quantity and extraction time are essential.
The V60 drip scale is used to simultaneously measure both of these factors.
*The V60 metal drip scale is equipped with a rechargeable battery and has a backlight design.

Both extraction quantity and extraction time can be measured simultaneously.

Due to its thinness, compact storage is possible.

The stainless weighing platform can be removed by turning.

Dirt is easily wiped off, and care for the device is simple.

Extract the coffee with a simple press
The coffee press

Place course ground coffee, and moisten with boiling water for approximately one minute. The longer the moistening time, the richer the taste will be.

※ Pour the boiling water gently along the wall of the glass. Press the knob down slowly after approximately two minutes.

Cloth Drip

Due to the slow extraction of coffee through the fine and delicate cotton flannel, it never compromises on the acidity, bitterness, and flavor from the bean's original characteristics. Furthermore, you will be able to feel the coffee's rich taste from the coffee oils, which is an advantage to this method.

Medium grind coffee grounds

Let the coffee grounds expand.

Cloth filter : Cotton flannel

●After using the filter cloth, please rinse thoroughly. Place the filter in a container with clean water and store it inside the refrigerator.

※This is to prevent oxidation of the oil of the remaining coffee grounds on the cloth filter.
※ The cloth filter can be replaced.

Filter-in Coffee Bottle

Cold Brewed Coffee

Wine bottle shaped cold brew coffee bottle

Just by adding coffee grounds and water, you can make iced coffee. Put coffee grounds in the strainer, and place the lid. Set the spout and pour small amounts of water inside. Once the water is poured, put the stopper and gently shake the bottle to start the extraction. Refrigerate for approximately 8 hours for the cold-brew to complete.

The strainer can be removed. The upper parts are designed to put a lid on the bottom strainer.

Align the strainer with the spout.

Pour directly.

Tea

＊ The design of the product may change without notice in order to improve quality. Thank you for your understanding.

Filter-in Bottle

Wine bottle shaped cold brew tea bottle

Created from the idea to enjoy cold brewed tea like wine during meals, we designed the wine bottle shaped filter-in bottle. The filter is fixed onto the spout, so you can pour directly.

In addition to a 750ml bottle, a 300ml bottle is now available for individual use.

Just pour tea leaves and water together inside the bottle.

The filter mesh is fixed directly to the inside of the spout, so you can pour directly.

HARIO
LWF
LIVING
ACCESSORY

"HARIO LWF LIVING ACCESSORY"

A "HARIO LWF LIVING ACCESSORY" is a handmade glass product created by the "HARIO Lampwork Factory," a glass workshop in Nihombashi, Tokyo. It delivers tableware that glasswork artisans completed piece by piece with great care.

HARIO Lampwork Factory

“Sound” and “Light”

Along with delicate glass, a Bluetooth-compatible speaker with LED light on it decorates the room.
Enjoy the glitter of glass works meticulously handmade one by one with your favorite music and soft light.

new

BTOH-1T

C/T6　018853
φ 136・H 500

“OTOHIKARI” allows you to casually enjoy “sound” and “light” at the same time from your smartphone – a speaker within an interior lamp made of delicate glass work.

＊As it is handmade, the shape and size may differ slightly from those in the photos.

Double Wall Glass

A double wall glass with a surface made to look like cut glass.

Due to the double wall design, the heat does not transfer even when used with steaming hot beverages, making it safe to put directly on the table without a drink coaster. It can be used for both hot and iced drinks.

Cook

＊ The design of the product may change without notice in order to improve quality. Thank you for your understanding.

A glass lid rice cooker in which you can see the flavor

By increasing the thickness of the glass lid rice cooker, we made fire adjustment unnecessary, which was said to be the difficult part of cooking rice over a direct flame. The whistle on the top of the lid will let you know when to stop the flame. Once it whistles, stop the heat and let it steam for 15 minutes. Using the steam heat stored in the glass lid rice cooker will draw out flavors from the rice. The lid is a heatproof glass. Being able to see the rice cook is exciting and also worry free. All parts are made in Japan. Use this glass lid rice cooker with a glass lid to enjoy the rice flavors from a direct flame, inherited from ancient times.

For microwave

Cross-sectional view

The thick bottom of the rice cooker will adjust the heat that is transferred to the rice.

This rice kettle's rice bowl retains the flavor

Since the bowl has water-absorbing properties, it appropriately absorbs excess moisture from the rice, making a flavorful rice where you can see each separate grain. When reheating in the microwave, the water that was absorbed in the bowl gets released, forming a soft rice.

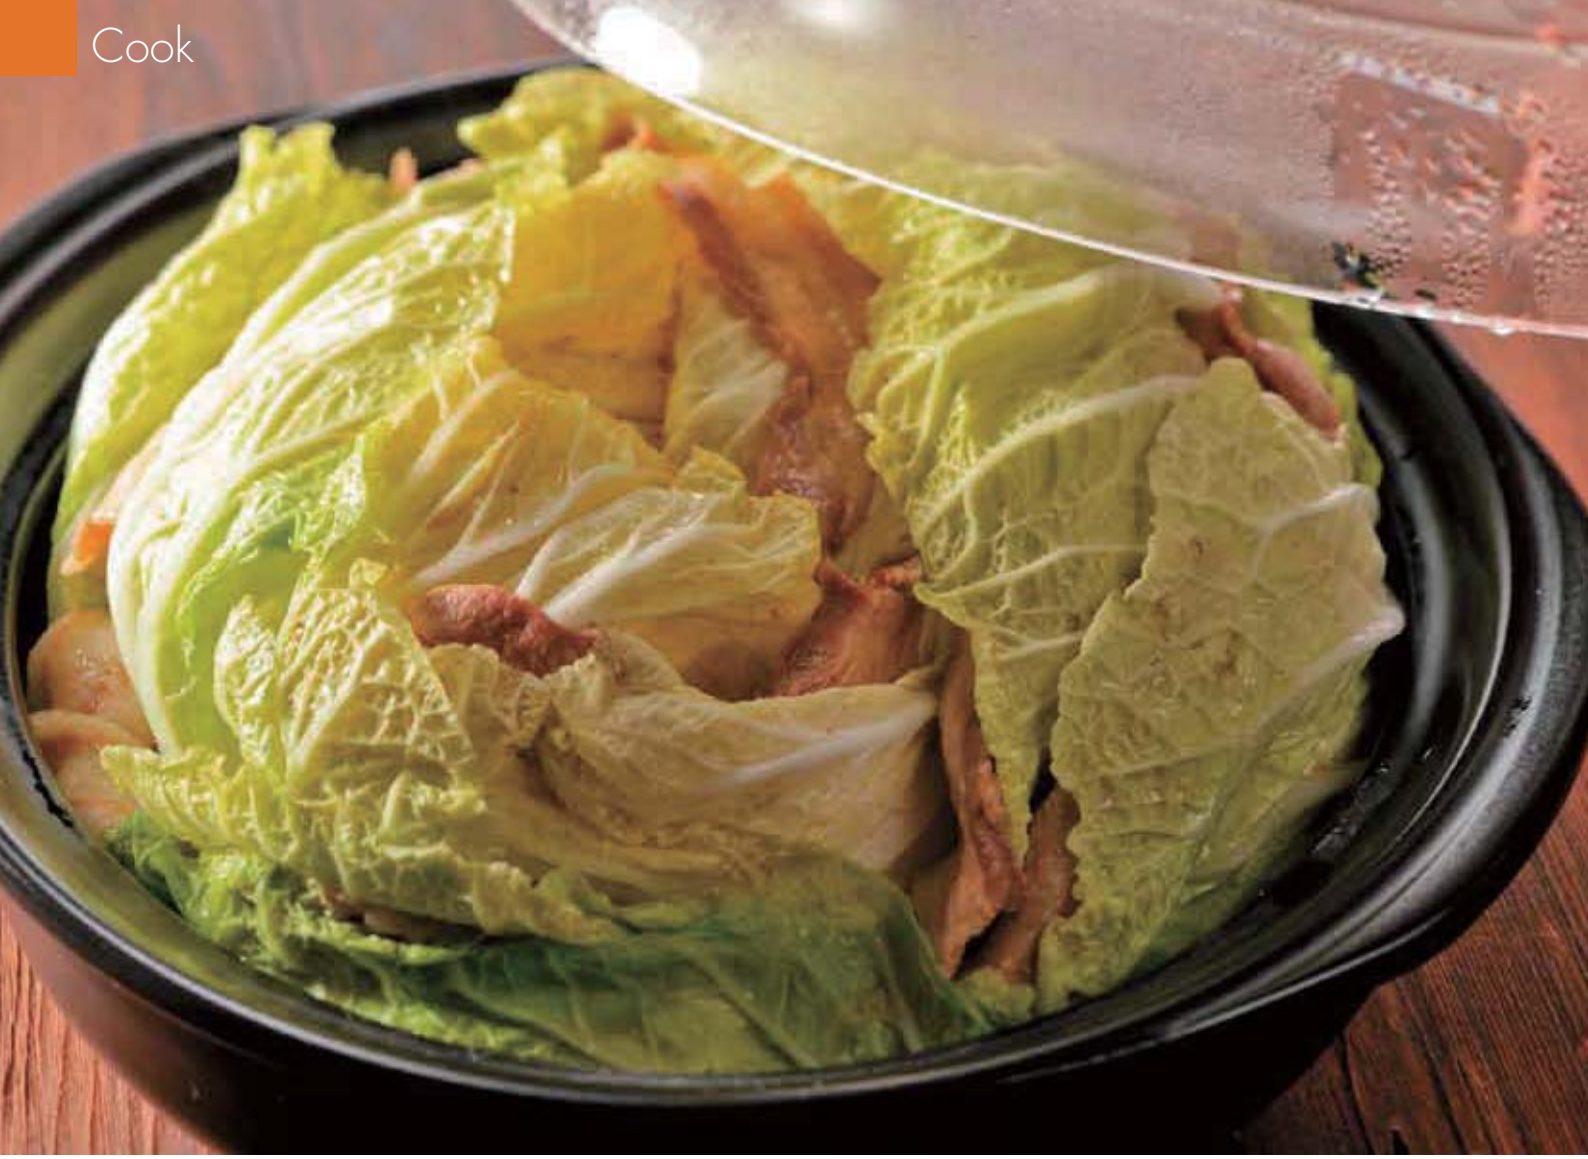

Microwave safe.

For microwave　Do not expose to open flames

GO-2B

C/T12　803824

for 4 servings

A pot surrounded by everyone

The pot with a glass lid is shallow and broadly shaped. To efficiently transfer the heat to the ingredients, the bottom of the pot is thin, while the side surfaces were increased in thickness to add extra insulation. Enjoy various dishes such as warming pot cuisines during the winter, and for the spring, summer and fall, enjoy stews and risottos. The simple design of the clay pot can be used to cook in the kitchen and can be brought out directly to the dining table, just like using a large plate. As the glass lid is heatproof, it is worry free as you are able to see the inside while it is cooking.

One shake is 1/2 teaspoon A measuring spice jar

As one shake is equivalent to 1/2 teaspoon, it will prevent you from excess salt or sugar intake. The heatproof glass jar makes it easy to know what's inside, and can be useful for dry herbs, and for refills on granular seasonings, as well as salt and sugar. Colors and smells are difficult to transfer, and it is safe to wash using hot water, dishwasher, and dish dryer. You can always use it cleanly.

An opening that can pour directly.

A three-hole opening to pour salt.

A measured opening that pours 1/2 teaspoon.

The underside of the top cap can be used as well.

＊In order to measure 1/2 teaspoon, close the lid opening, and flip upside down 180°. Return it back to its original state and turn the lid opening to the 1/2-teaspoon opening.

Can be stored inside one another.

Removable packing.

Microwave safe.

Rectangular storage containers made entirely of heatproof glass

The lid and body of these storage containers is made from heatproof glass. Due to its rectangular shape, space can be effectively utilized when storing. They can also be stacked on top of each other. The top surface has a clear appearance, and it is possible to view the inside of the container from the side. This product is microwave safe. Furthermore, by removing the lid, it can be used in the oven as well. The size differences make it possible to store each container inside each other making compact storage possible.

A teapot with a large tea strainer.

A large tea strainer is used so that tea can be easily extracted even with a small amount of water, allowing the tea leaves room to expand. Try using fruit in the tea for various combinations to enjoy.
Microwave safe when the metal strainer is removed.

You can make iced coffee with just coffee and water. Pour small amounts of water to wet the entire coffee grounds and drip with a circular movement. When the water is poured, refrigerate it for 8 hours and let the coffee seep.

Pour water to the line.

Easy to hold handle.

The tea strainer's bottom portion can be taken off for easy cleaning.

You can prepare delicious cold brew coffee with ease

Easy to hold and easy to wash are our standards

The form factor makes it easy to hold, and can be stored in the refrigerator. With its wide opening, it's easy to wash and keep clean for long periods of use. Due to the pot's heatproof glass, color and smell of food is less likely to transfer to the glass. It's also dishwasher safe.

Easy to hold, easy to pour.

Compact size that fits inside the refrigerator rack.

Spare Parts

In order to be able to utilize good products for longer periods of time..

Even if you are careful, occasionally the glass may crack or you may lose parts. Even in these situations there is no need to worry. Hario products stock plenty of spare parts to replace the missing parts. In order for you to continue using your favorite products for longer period of time, we continue to create products while keeping in mind on how to enhance our after-sales services.
