

HARIO

V60 COPPER DRIPPER

A coffee dripper made of copper that has excellent thermal conductivity. Copper conducts heat very well and distributes it evenly. Due to the antibacterial property of the copper, it is used widely for kitchenware.

Instruction Manual

Thank you for purchasing this HARIO product. Please be sure to read this instruction manual thoroughly prior to use. After reading the manual, store it in a safe place for future reference.

Handling precautions

- Please do not touch the dripper during use and after use, it will be extremely hot.
- Because the handle is made of metal, continuous use will cause the handle to be extremely hot. Make sure to use a potholder.
- Please use this product only for making drip coffee.
- This product has a clear coating on the surface. The coating may become dull after extended use. Please also be careful when scrubbing the surface or applying any strong impact as it may also cause the coating to peel off.
- Please refrain from using the product if the handle becomes loose.
- Please follow your local regulations for disposal.

Material guide

- MADE IN JAPAN

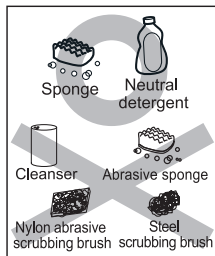

Body : Copper

Handle: Brass

Surface treatment : Clear coating

Product care

- Use a soft sponge and neutral detergent to clean this product. The surface is clear coated and very delicate. Please do not use soft sponges with cleansers or abrasive agents and scrubbers that may scratch the surface as shown in the diagram. These will damage the clear coating.
- This product is not dishwasher safe and cannot be soaked in household bleach.
